VULCAN PROJECT

A key element of the training program at the National School of Engineering of Metz, the Automotive Performance final year option offers a major challenge to the students completing their formation. The students' objective is to design and build a single-seater racing car in a single year to participate in the international Formula Student competition.

AN INTERNATIONAL CHALLENGE

Founded by the S.A.E. (Society of Automotive Engineers), the Formula Student challenge allows engineering students from all over the world to get involved in an automotive competition project and to put their skills to the test through a real-life exercise.

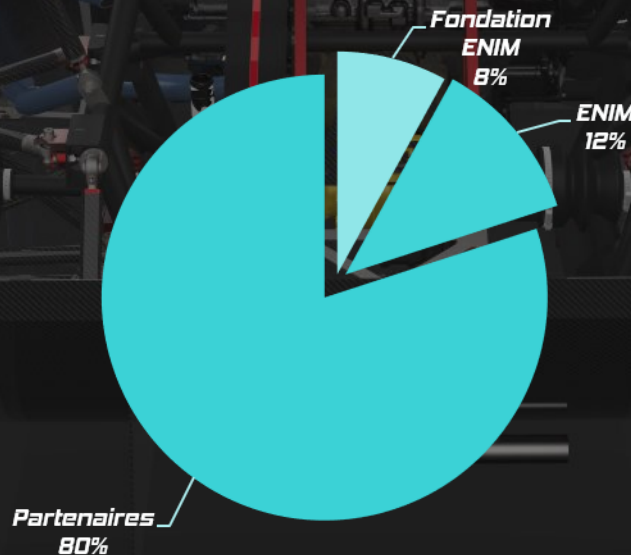

OBJECTIVES

The team is aiming for even higher goals like :

- To achieve a TOP 3 at the Silverstone competition,
- To realize the most successful monocoque of the MRT,
- L'aTo improve the reliability of the single-seater.

WE NEED YOU

A project such as ATLAS represents a significant budget, of which about 80% is provided by partners.

HOW TO SUPPORT US ?

The MRT invites you to become a sponsor of the VULCAN project! All funds collected by our team are eligible for the legal status of patronage, including a tax exemption of 60% of the value of the endowment. In addition, the MRT offers its partners to promote their companies on social networks and on the team's website. And also presenting the companies on our school's newsletter.

On top of that, our single-seater will also proudly display the logos of the MRT partners during the competitions throughout Europe.

YOU TOO JOIN THE VULCAN PROJECT !
